

The logo for AOC (Africa On Call) is rendered in a bold, white, sans-serif font. The letters are thick and blocky, with a slight shadow effect that makes them stand out against the dark, crystalline background.The logo for MMD (Mines and Minerals Development) is rendered in a bold, white, sans-serif font. The letters are thick and blocky, matching the style of the AOC logo. The 'M' and 'D' are particularly prominent due to their size and weight.

[ Conflict Minerals  
Report **2019** ]

# Table of contents

OUR DEFINITION OF CONFLICT MINERALS	3
OUR CONFLICT MINERALS MANAGEMENT POLICY	3
OUR DUE DILIGENCE PROGRAM	4
APPENDIX: SMELTER/REFINERY LIST	5

# Our definition of conflict minerals

In Congo-Kinshasa and the surrounding countries, the mining of tin, tantalum, tungsten and gold (known as “3TG” conflict mineral), cobalt and other rare earth elements have caused serious human rights and environmental issues. Most of the mining activities in these areas associated with armed groups of conflict (funding), lead to long-term instability in the region.

Various parties, including the United States Congress, have concerns that the exploitation and trade of conflict minerals by armed groups is helping to finance conflicts in the DRC region and is contributing to an emergency humanitarian crisis. Following the conflict minerals approach, we will focus on 3TG and cobalt which are widely used in electric products.

# Our conflict minerals management policy

Being a TPV branch company, AOC & MMD adopts TPVs conflict minerals management policy including conflict minerals definition in I&D (Innovation & Development), supply chain CMRT investigation and survey, and the OECD-5 step framework. Being a brand company, AOC & MMD only requires the monitor part for conflict minerals control. Since it is not easy to separate the monitor's conflict minerals from all the suppliers of TPV, AOC & MMD accept the whole supplier CMRT investigation results for disclosure.

To support the global prohibition of conflict minerals, AOC & MMD also drive TPV related facilities and its suppliers to avoid procurement of conflict minerals. AOC & MMD and our suppliers neither directly nor indirectly finance armed groups in conflict-affected regions. AOC & MMD and suppliers neither tolerate nor contribute to human rights abuses that include forced labor, child labor and environmental degradation.

# Our due diligence program

Based on the second edition of the *Organization for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas* (including its supplements on 3TG, referred to in this report as "OECD Guidance"), AOC & MMD participates in the Responsible Mineral Initiative (RMI) that uses an independent third-party process. The RMAP (Responsible Mineral Assurance Process) will lead to a list of smelters who comply with the criteria of RMI or smelters that need to improve.

Based on the OECD's five-step framework for due diligence in the mineral supply chain, AOC & MMD has the following system in place.

## Step 1: Establish strong company management system

- 1) AOC & MMD has disclosed this conflict minerals report with the conflict minerals management requirement on [www.aoc.com](http://www.aoc.com) and [www.mmd-p.com](http://www.mmd-p.com);
- 2) AOC & MMD has committed not to purchase raw materials, subassemblies, or supply conflict minerals that directly or indirectly finance or benefit armed groups in the DRC or an adjoining country.
- 3) AOC & MMD requires suppliers to complete the Conflict Minerals Reporting Templates (CMRT) on a yearly basis. Suppliers also need to sign our Supplier Code of Conduct.

## Step 2: Identify and assess risks in the supply chain

- 1) TPV is the supplier of the monitors of AOC & MMD. They are our first-tier supplier and have a low risk following our risk review system. TPV itself has established the risk review system in the whole supplier chain, identifying the metal parts as high risk if they have either of

tin, tantalum, tungsten, gold and cobalt. They identify the metal parts as low risk if they have other metals than tin, tantalum, tungsten, gold and cobalt. Other non-metal parts are seen as no risk.

- 2) According to the above risk identification, AOC & MMD confirms that TPV addresses high and low risk suppliers for due diligence investigation: a). TPV requires high and low risk suppliers to sign the guarantee letter that they do not directly or indirectly finance or benefit armed groups in the DRC or an adjoining country, neither do they tolerate nor contribute to human rights abuses that include forced labor, child labor and environmental degradation.
- 3) AOC & MMD requires TPV to execute annually a CMRT (Conflict Minerals Reporting Template) investigation and to provide the CMRT investigation results each March. AOC & MMD also relies on industry programs like the RMAP to carry out smelter assessments, and we also rely on the RMAP compliant smelter list to determine whether smelters performed due diligence.

## Step 3: Design and implement a strategy to respond to identified risks

AOC & MMD identifies non RMAP compliant smelters as high risks and our the percentage of RMAP smelter and/or refiners shall be more than 90%. For non RMAP smelters or refiners, AOC & MMD will drive TPV and its supply chain to take action, either drive the suppliers to change to RMAP smelters or refiners, or help them to become RMAP compliant.

## Step 4: Plan an independent third-party audit of the smelter or refiner's due diligence

AOC & MMD relies on information provided by the RMAP and uses the RMI RCOI report to identify the country of origin and conflict-free status of smelters.

## Step 5: Report annually on supply chain due diligence

From 2019, AOC & MMD reports annually on supply chain due diligence and will continue to update the smelter list.

AOC & MMD requires TPV to annually execute a CMRT investigation in the whole supply chain. In 2019, TPV has initiated a high-risk supplier survey and the response rate was 100%. In summary, until July 15, 2020, there were 268 3TG + cobalt smelters or refineries in the supply chain, and all of them have participated and passed the RMAP certification. The main difference between 2019 and 2018 is that the cobalt smelters are added to the list.

AOC & MMD will collaborate with the responsible team of TPV to strengthen the due diligence practice in the supply chain, and will cooperate with RMI for a transparent supply chain.

AOC & MMD actively encourages its employees and other parties to report concerns either directly to the company or by sending an email to Lissa Wang; [lissa.wang@aoc.com](mailto:lissa.wang@aoc.com) or [lissa.wang@mmd-p.com](mailto:lissa.wang@mmd-p.com). AOC & MMD values your feedback to minimize procurement risks and increase responsibility to the international community's actions against conflict minerals.

## Appendix: Smelter/Refinery list

Below you can find the 2019 smelter/refinery list of TPV.
